

American Petroleum

WHO IS THIS SERVICE FOR?

American Petroleum introduces its new on-site fueling service, designed to deliver fuel directly to your equipment and vehicles at your facilities.

Who is the target audience?

This service eliminates wasted time and optimizes operations, ensuring every workday starts without interruptions.

We distribute diesel and gasoline to the following sectors:

-  Transportation and logistics
-  Essential and emergency services
-  Construction and industrial
-  Commercial and residential sectors

This service is also ideal for clients without on-site storage tanks, eliminating the need for additional investment and logistical complexity.

Why choose this service?

- **No vehicle minimum**
From a single vehicle to an entire fleet.
- **Extended hours (6:00 PM – 6:00 AM)**
Receive fuel during non-operating hours and avoid business interruptions.
- **Save time and resources**
Eliminate the need to reroute personnel for fueling; we come to you.
- **Safety and efficiency**
Direct fuel delivery to your equipment, with a clear record of every transaction.
- **Centralized cost management**
Simplify your financial operations with unified and transparent reporting.

How does the service work?

The process is very simple:

- 1** The client requests the service by phone.
- 2** The client provides the details: equipment or vehicles, number of gallons, location, and preferred time slot.
- 3** Receives an immediate quote.
- 4** Once approved, the delivery is scheduled.
- 5** Our team delivers fuel directly to each unit.
- 6** A report summarizing the service is provided.

Our team is ready to assist you and provide the solution your operation needs. Contact us today for more information!
