Are You an Active Client of American Petroleum?

Here are some details you should not forget:

1. Know Your Account Representative:
It is vital to know your Account Representative, as they handle your requests and provide details such as prices, availability, and delivery dates. During emergencies, communication intensifies, so having an established relationship is crucial.
2. Ensure Your Account is Active:
An active account must have at least one delivery in the past year. This allows for adjustments to address changes in delivery details or address. To manage emergencies effectively, it is essential that our drivers are familiar with your facility and that the billing team has up-to-date information.
3. Delivery Time for Emergencies:
For emergencies, your order should be placed at least 36 hours before the required day. Due to the high volume of calls and deliveries, we want to ensure that we can serve you adequately.

Storage Tank

At American Petroleum, we offer rental tanks of various capacities to meet your emergency or temporary project needs and ensure efficiency.

The tank can be rented individually or set up as a portable service station, which includes a hose, meter, pump, and nozzle. This option allows our clients to supply diesel directly to their equipment and/or fleet vehicles.

Capacities and Gallonage

At American Petroleum, we offer storage tanks in a range of capacities to suit your needs:

- 500 gallons
- 4,900 gallons
- 6,000 gallons

Emergency Handling

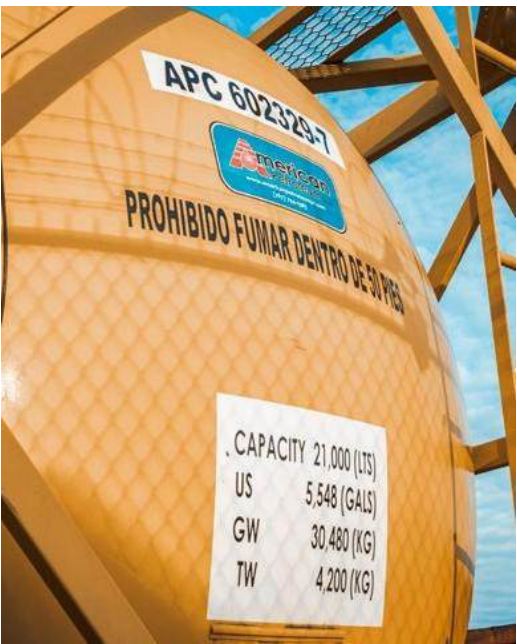

The availability of equipment is variable, so please consult with your Account Representative to request a quote, check availability, and determine the preparation time required to meet your needs.

How to Request a Storage Tank:

1. Contact your Account Representative.
2. Request the service and specify if you need a pump, meter, and nozzle.
3. Schedule American Petroleum's personnel to visit your facility and install the equipment.

What to consider:

- Preparation of the tank requires two weeks.
- Ensure that your account with us is active.
- Dikes are not included but are available for rental.
- The pump requires a 220v connection.
- The equipment can only be used for one type of product at a time. If you need to switch fuels, you must notify the office to perform the necessary maintenance.

Specifications for the 6,000-Gallon ISO Tank

Portable Service Station

This service has gained popularity over the years and is crucial during hurricanes, blackouts, emergencies, or unexpected events when managing your projects.

The portable service station is a 6,000-gallon ISO tank equipped with a meter, pump, and nozzle that can supply gasoline or diesel. This allows your equipment to access additional fuel and provides the flexibility to deliver fuel directly to your site.

Who needs it?

- Companies vulnerable to blackouts and emergencies, such as health centers and businesses that cannot afford to run out of fuel or wait long in case of an emergency.
- Companies with projects in remote and changing locations.
- Companies seeking greater flexibility in their fuel supply.

What to consider

- The pump has a 220v connection.
- The equipment comes with an approximate meter for deliveries; it is important for the client to keep their own record to determine the exact remaining volume.
- The equipment can only be used for one type of product at a time. If you need to switch fuels, you must notify the office to perform the necessary maintenance.
- When renting the equipment, our maintenance staff will provide provisional services.

Fuel Distribution Trucks

American Petroleum offers truck rentals for fuel distribution to individuals or companies that do not have the necessary equipment or fleet for emergencies or multiple concurrent projects.

This service allows our clients to benefit from the speed and efficiency we provide at our facilities to fuel their trucks. Additionally, if routes are congested, they will have an alternative supply option and greater flexibility by being able to refuel their equipment at various locations.

Capacities and Gallonage

At American Petroleum, we offer trucks ranging from 900 gallons to 6,000 gallons to meet all types of needs.

Who needs it?

- Companies with short- or medium-term remote projects.
- Companies that would benefit from controlling their fuel distribution.
- Companies with remote locations looking to maximize efficiency.

What to consider

- The truck driver is not included. If a driver is required, there are specific considerations to keep in mind.
- Equipment rental does not include insurance policies; it is important for the client to provide this.

American Petroleum is ready to serve you and your company, ensuring service, flexibility, and product availability whenever needed, with new equipment available for rental. Please do not hesitate to contact us for more information.
